Title

Author[1]   project size

Here goes the text of your abstract. Please send us an overhauled version with specific formatting. You can use the LaTeX source code of this page as template and everything will be good :)

The word limitation still stands, but we welcome you to adjust your abstract to comments that you may have received. In no case may you use up more space than one A4 page. Your PDF should have A4 format, 'Times' font, font size 12 pt, about 110% line spacing, standard LaTeX article class page margins, and no page number. Your title, name, university, and e-mail address go as indicated above. Feel free to make your e-mail address a URL. For 'project size' please insert the scope of your project (seminar paper, bachelor thesis, master thesis, etc.)

For the bibliography, you can write "References", "Bibliography", or in German "Bibliographie", . . . anything goes.

You're welcome to use a different typesetter/text editor than LaTeX, but please make sure your PDF looks the same (don't forget to adjust page and paragraph margins).

References

Reference 1. Use any common citation format you like — we're not picky about dots and brackets.

Reference 2. You're also very welcome to use BibTeX!
